### Standardised European Alcohol Survey

### SEAS-2 QUESTIONNAIRE\_APPROVED MASTER VERSION

#### Executive summary of the SEAS-2 activities

##### 1. Introduction

The second wave of the Standardised European Alcohol Survey (SEAS-2) aimed to revise and adapt SEAS-1 (RARHA SEAS). The SEAS survey assesses epidemiological and cultural variables related to alcohol in the European region, in the general population aged 18-65 years. SEAS-2 was deployed in 33 countries (27 EU countries, UK, Norway, Iceland, Bosnia-Herzegovina, Moldova and Serbia), in 34 different languages, and improves the level of harmonisation across countries in terms of the content of the survey questionnaire contents and quality controls. The mode of administration of the survey was either Computer-Assisted Web Interviewing (CAWI) or Computer-Assisted Telephone Interviewing (CATI), or both, depending on the country. Respondents of the survey are recruited from the general population from the national Lightspeed Profiled Research Panels of Kantar TNS.

##### 2. Translation and adaptation of SEAS-2

The final version of the master English SEAS-2 questionnaire was approved in May 2020. Native speaker experts in the alcohol and public health fields were recruited from the RARHA network and from the extended networks of the DEEP SEAS partnership for each survey country. For those languages available in SEAS-1, the translated versions of the SEAS-1 questionnaires were used as a reference for the translation and adaptation of the SEAS-2 questionnaire to the local variety of the language(s), in order to ensure consistency between the two waves. The national experts revised the list of alcohol

### **3. Using the SEAS-2 dataset and questionnaires**

The owner of the SEAS-2 data and translated questionnaires is the Health and Digital Executive Agency (HaDEA) of the European Commission. The DEEP SEAS group, as contractors of the tendered service contract number 20177113, are authorised to share this data and supporting files publicly in line with HaDEA's policy to provide open access to documents and data created with EU funding.

Researchers interested in accessing and using the dataset can download the public files from the DEEP SEAS website (<https://www.deep-seas.eu/standard-eu-alcohol-survey/>).

The final local language versions of the questionnaire for 33 countries, as shown in the table below, are not annexed for reasons of size, but are available from HaDEA upon request.

**Prior to any publication, researchers should request permission to use the data via email to: [hadea-hp-tender@ec.europa.eu](mailto:hadea-hp-tender@ec.europa.eu).**

Good morning/afternoon/evening, I am INTERVIEWER'S NAME. We are conducting an important international study as part of the European Commission funded contract DEEP SEAS ([www.deep-seas.eu](http://www.deep-seas.eu)), about people's experiences, opinions and attitudes towards alcohol. It does not matter whether you drink or not or how much you drink. This survey also includes personal subjects, so we need your explicit consent for the processing of these kinds of data. (*i.e. you can refuse to respond to personal questions – e.g. about religious beliefs, etc*).

We are interested in capturing as wide a range of views as possible and would greatly appreciate your participation through this survey. The questions should take no more than 20 minutes of your time.

Your participation in the study is completely voluntary and you can refuse to respond to any questions or stop the survey at any time. Any personal data will be gathered and stored in line with the latest EU data protection regulations (GDPR 2016/679), and your anonymity is entirely guaranteed. Your name or any other information that identify you as a person will not be recorded or associated in any way with your responses. You can exercise your rights by sending an email to [gdpr.kantar@kantar.com](mailto:gdpr.kantar@kantar.com).

Do you agree to participate in this study?
